About me

I am a young and enthusiastic software engineer who started my journey in the world of programming less than a year ago. During this time, I have been able to successfully complete several simple and practical projects that have helped me strengthen my technical skills. As a novice Backend Developer focusing on the Golang programming language, I am looking for an opportunity to work in a professional team and gain more experience. I am interested in learning and developing my skills and hope to contribute to the growth and success of the company with my creativity and motivation. I can work as an intern and do projects that are at my level because I do not have any experience working in a company or group.

Skills

- **Primary Programming Languages:** Go (golang).
- **Databases:** PostgreSQL, Redis, MongoDB, MySQL.
- **DevOps:** Docker, Kubernetes, OpenShift, Gitlab CICD, Helm.
- **Tools:** Git, Node.js, Kafka, RabbitMQ, gRPC, NATS.
- **Architecture:** Microservices, Event-Driven, System Design, SOA, Modular Monolith.
- **Some Other Technical Skills:** TDD, GitHub Actions, Clean Code, Design Patterns, Smart contracts (Solidity), Web3, Fiber, Gin
- **Languages:** English (Fluent), German (Intermediate, In progress), Persian (Native)

Projects

- **Dongilo :** Instant calculation of each person's share of the purchase invoice(**private**).
- **Calculator :** Simple calculator written in Golang.([link](#))
- **Subtitle :** A simple but useful program for extracting video subtitles and outputting them as JSON.([link](#))
- **Gold_store:**A simple and user-friendly program for those who have a store and need a suitable and efficient program to manage the store.([link](#))

- [Vpn_bot](#): There is a simple bot about buying VPN accounts that still needs to be completed..([link](#))

Volunteering

- Contributing to open-source projects, and open-sourcing my own projects
- Answering and asking questions on [Stackoverflow/Mehdihoseini](#)
- Writing technical articles on [Dev.to/Mehdihoseini](#)
